TMA Technology, Ltd.

"You can't manage what you can't measure"

TMA Technology, Ltd web-site (www.TMATech.com) and the Radiation Oncology Performance Enhancement (ROPE) database work in tandem to support the radiation oncology manager.

- Efficiency Matters!
  - o Consolidate QA initiatives in one comprehensive database with extensive report capabilities.
  - o Email reminders for performance appraisal due dates and licensure/certification expiration dates.
  - o Database support by **TMA Technology, Ltd**. Industry leading ASP technology constantly upgraded with minimal IT support issues.
  - o One stop resource for new program initiatives; IMRT, IVBT, Stereotactic, Prostate Seed Implant.
  - o Policies & Procedures: All content is constantly updated and kept current with JCAHO, ACR standards and AAPM Task Groups.
- Justify equipment upgrades and replacement with equipment issues and maintenance tracking.
- Productivity reporting tracks the time for dosimetry treatment planning issues, physics and routine equipment QA and calibration time schedules.
- Development of best practices with benchmarking identifies opportunities for improvement within your department.
- The website (www.TMATech.com) provides a continuous broad-based wealth of radiation oncology information to benefit managers day to day.
- On-line information, accessible via browser on PDA in wireless environment provides vital information anywhere in the clinic.
- Benchmarking data compiled in the future allows you to compare your clinical processes with other facilities and identify the best practices in similar clinics nationwide.
